

Trying to Drive Energy Savings?

Specify LEESON energy-efficient motors, gearmotors and drives.

LEESON gives you more than one way to drive down energy costs with energy-saving motors, gearmotors and drives. WATTSAYER® premium efficiency motors meet the NEMA premium standard of efficiency, meeting or exceeding utility rebate programs. LeCENTRIC™ inline reducers deliver high efficiency output using AGMA Class 10 or better helical gearing. Further reduce your energy bill by combining these products with LEESON SPEEDMASTER® AC drives to control total system power consumption.

Contact the motion system experts at LEESON with your efficiency requirements.

Now Grove Gear, Electra-Gear, Lincoln Motors and LEESON products are all available through one central connection.

More Than Just a Motor Company.
